PROFESSIONAL SUMMARY

Full stack and AI/ML engineer with hands on experience across React, Node.js, Python and Java, building real production features, REST APIs and gRPC microservices at Antier Solutions. Led the AI and computer vision side of a gesture recognition project, training and tuning models with PyTorch, TensorFlow and OpenCV, and led the team behind CoBuild, winner of the GovHack 2025 Victorian State hackathon, built end to end in under 48 hours. Comfortable picking up new languages, frameworks and domains quickly, and equally comfortable communicating with technical and non technical people, from tutoring kids in coding and AI to guiding over 500 students through career decisions as a university ambassador. Invited to speak at the Microsoft Melbourne office on Docker and containerisation. Looking for a team where I can keep building real things and keep learning.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C++, C#
Frontend: React.js, Next.js, Redux, HTML5/CSS3, Bootstrap
Backend and APIs: Node.js, Express.js, Nest.js, Django, FastAPI, REST APIs, gRPC, Microservices
Cloud and DevOps: AWS, Docker, GitHub Actions, CI/CD pipelines, Git
AI and Machine Learning: PyTorch, TensorFlow, scikit-learn, OpenCV, YOLOv8, computer vision, model training and tuning
Data: PostgreSQL, MySQL, MongoDB, Redis
Core Strengths: Fast learner, problem solving, clear communication, teamwork, working directly with end users

EXPERIENCE

Operations and Inventory Coordinator · Manpower / ID Logistics **2025 to Present**
Full time · Melbourne

- Handle mostly computer based inventory and order management, staying productive and accurate even during high volume, high pressure periods.
- Investigate stock and system discrepancies as they come up and resolve issues quickly with team leaders, communicating clearly under time pressure.

Private Tutor · Coding and AI for Kids **2024 to Present**
Self employed · Melbourne

- Teaching kids aged 8 to 14 the basics of coding, AI concepts and staying safe online through hands on lessons and small projects since 2024.
- Break down technical ideas like algorithms, chatbots and how AI makes decisions into simple, age appropriate language and activities.

DeakinTALENT Ambassador · Deakin University **Feb 2025 to Nov 2025**
Part time · Burwood

- Worked directly with over 500 students one on one, giving clear career guidance and resume feedback.
- Put together promotional content that helped lift service usage across campus by about 20 percent.

Software Engineer, Full Stack Developer · Antier Solutions Pvt. Ltd. **Jul 2023 to Jun 2024**
Full time · India

- Built BlockAgile, a JIRA style platform used by multiple internal teams at once, with live dashboards that cut manual progress reporting by half.
- Developed full stack features with React, Node.js and JavaScript, working across REST APIs and gRPC microservices, using PostgreSQL and MongoDB for data storage.
- Led the AI and computer vision side of a gesture interface project end to end, from model training in Python through to a working, demoable product, improving detection accuracy by 12 percent using YOLOv8 and EfficientDet.
- Worked with Docker to containerise and deploy services consistently, and later spoke publicly at the Microsoft Melbourne office about this exact topic.

PERSONAL PROJECTS

DigiSpy · Teaching Kids AI and Cyber Safety **2026 to Present**

- Building an interactive learning project that introduces kids to AI and cybersecurity concepts through games and simple challenges, used as part of tutoring sessions.
- Designing the activities to make ideas like phishing, passwords and how AI models work easy for a young audience to grasp.

CoBuild · GovHack 2025 Victorian State Winner **Aug 2025**

- Led the architecture and team coordination for a full stack platform built in under 48 hours, integrating several public data sources into one working tool for councils, using Node.js, React and Python.

SPEAKING EXPERIENCE

- Invited speaker at the Microsoft Melbourne office, talking through Docker and containerisation, dev to production consistency, dependency management and deployment workflows.

EDUCATION AND CERTIFICATIONS

Master of Data Science (Professional): Deakin University, Burwood, VIC, Jul 2024 to Jun 2026
Bachelor of Engineering, Computer Science: Chitkara University, India, CGPA 9.51/10, Jul 2020 to Jun 2024
Certifications: IBM AI Developer (Professional), Blockchain Specialisation from University at Buffalo, Advanced Web Development from Coding Ninjas
