AMRITJOT SINGH

SOFTWARE ENGINEER | FULL STACK & BACKEND | APPLIED AI

Melbourne, VIC | 0420 291 207 | amritjotsingh4322@gmail.com
amritjot.in | linkedin.com/in/amritjotsingh4322 | github.com/amrit4322

PROFESSIONAL SUMMARY

Software engineer and Deakin Master of Data Science (Distinction) graduate with 1 year of industry experience building full stack applications, backend APIs and machine-learning systems. Delivered production features in React, Node.js and microservices that cut manual reporting effort by ~50% and improved API response times by ~30%. GovHack 2025 Victorian State Winner who turns ambiguous problems into working software, collaborates across disciplines and communicates with technical and non-technical stakeholders. Seeking graduate, junior and associate roles in software engineering, backend, full stack and applied AI.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, C#, SQL
Frontend & backend: React, Next.js, Node.js, Express, NestJS, FastAPI, REST APIs, gRPC, microservices, HTML/CSS
Data & AI: PostgreSQL, MySQL, MongoDB, Redis, PyTorch, scikit-learn, TensorFlow, OpenCV, LLM/VLM evaluation
Cloud & quality: Azure, AWS, GCP exposure, Docker, Kubernetes, Git, GitHub Actions, CI/CD, unit/integration testing, debugging, secure API design

EXPERIENCE

Software Engineer / Full Stack Developer, Antier Solutions, India | Jul 2023 - Jun 2024

- Engineered responsive React and Node.js features for client web applications within an Agile development team.
- Designed and implemented REST APIs and gRPC microservices backed by 2 databases (PostgreSQL and MongoDB), connecting frontend and backend services.
- Delivered BlockAgile project dashboards and automated reporting workflows, reducing manual progress-reporting effort by ~50% for project managers.
- Profiled and optimised backend services and database queries, achieving ~30% faster API response times.
- Co-developed 2 computer-vision object-detection models (YOLOv8 and EfficientDet), preparing datasets, training models and evaluating accuracy.
- Conducted code reviews, debugging and unit/integration testing to safeguard code quality across production releases over 12 months.
- Partnered with designers, QA engineers and project managers across 3 disciplines to translate client requirements into technical tasks and deliver features on schedule.

ADDITIONAL EXPERIENCE

Operations & Inventory, Manpower / ID Logistics, Australia | Dec 2025 - Present

- Investigated and resolved inventory and system discrepancies in a high-volume, multi-client distribution warehouse.
- Analysed operational and stock data to identify root causes of mismatches, improving record accuracy in the warehouse management system.
- Coordinated corrective actions with team leaders and escalated critical issues to meet time-sensitive dispatch deadlines.
- Upheld safety, quality and process standards while adapting to shifting priorities.

DeakinTALENT Ambassador, Deakin University, Australia | Feb 2025 - Nov 2025

- Guided 500+ students on career resources, employability programs and industry events at Deakin University.
- Coordinated careers fairs, employer events and workshops across a 10-month tenure, managing student enquiries, registrations and on-the-day logistics.
- Promoted career services alongside university staff and cross-functional teams to boost student engagement.
- Explained complex program information to students from diverse cultural and academic backgrounds.

PROJECTS

CoBuild – GovHack 2025 Victorian State Winner | React, Node.js, Python

- Co-led a multidisciplinary team to design and prototype a civic-data platform addressing Victorian housing and infrastructure challenges in 48 hours.

- Integrated public government datasets with interactive maps using React, Node.js and Python to surface location-based insights.
- Scoped requirements and divided tasks across the team, turning an open-ended problem into a working prototype.
- Pitched the solution to judges and won the GovHack 2025 Victorian State award.

DigiSpy – AI & Cyber Safety Learning Platform | Next.js, Supabase, PostgreSQL

- Built an AI and cyber-safety learning platform in Next.js with guided missions, live teacher controls and child-friendly student views.
- Secured the platform with Supabase authentication, PostgreSQL row-level security and role-based access for 2 user roles (teachers and students).
- Architected the data model and features that let teachers monitor progress and manage classroom sessions in real time.

PIPER – Deakin Master's Research Thesis | Python, PyTorch, PPO, Gymnasium

- Devised and ran experiments benchmarking 2 AI paradigms, reinforcement-learning agents versus LLM/VLM approaches, on physical-reasoning tasks.
- Trained PPO baseline agents in Gymnasium environments using PyTorch, tuning hyperparameters for stable training.
- Evaluated trajectories, success rates and failure modes, documenting findings and recommendations in a Master's research thesis.

EDUCATION & CERTIFICATIONS

Master of Data Science (Professional), Deakin University | Sep 2026, Distinction
Bachelor of Engineering, Computer Science, Chitkara University | Jun 2024, CGPA 9.51/10
Microsoft Azure AI Fundamentals (AI-900) | **IBM AI Developer Professional Certificate**

PROFESSIONAL STRENGTHS

Structured problem-solving · Stakeholder communication · Team collaboration · Critical thinking · Adaptability · Ownership · Continuous learning
